# Problems

## **Problem 1**

Lack of communication/interaction with seniors

## **Problem 2**

Need to introduce a platform for guidance in order to get trained in a particular skill within the campus

## **Problem 3**

Unavailability of updated content

## **Problem 4**

The problem of finding links to access different groups in order to interact with seniors

# Solution

---

We are making an app or a website to help eliminate the communication gap between seniors and juniors.

All the registered students will be distinguished based on the year they study and their skills. There will also be a provision to help students share notes, assignments, and other study materials on the website.

In case of any doubts/queries, the website will provide a separate section to clarify your doubts from the students with experience in the particular field.

It is not just limited to the academic needs of students but will also act as a platform to provide proper guidance for proper initiation to get trained in a particular skill.

The website will help students avoid the problem of joining different groups for different purposes.

It will free students from the congestion of groups on WhatsApp, discord, and other sites.

The image features a light gray background. On the left side, there are two vertical bars: a light blue one on the far left and a purple one next to it. In the bottom right corner, there are two overlapping geometric shapes: a light blue trapezoid and a purple hexagon.

Thank You
